Home: Kamembe, Kamembe (Rwanda)

ABOUT ME

Innovative and detail-oriented professional with diverse experience in software development, IoT solutions, and web technologies. Proficient in backend development using Flask and Django REST Framework, with expertise in creating efficient APIs, payment processing integrations, and PDF report generation. Skilled in front-end development with React and responsive design principles, ensuring seamless user experiences. Strong background in 3D rendering using Three.js and optimizing for mobile devices.

Experienced in IoT systems, including fingerprint-based authentication, smart shopping carts, and Arduino projects with NodeMCU and ESP32-CAM. Demonstrates a knack for troubleshooting hardware and software integration, particularly in biometric and proximity detection systems. Adept at leveraging modern tools like FontAwesome, jQuery, and OpenCV for dynamic and interactive applications. You can provide a description of yourself here...
