Manzi Enock IMPANO

Experienced full-stack developer with expertise in Python (Django), JavaScript (React), and Java (Android), along with a strong foundation in machine learning using TensorFlow. I hold a TVET advanced certificate in Business Services, which complements my technical skills by enhancing my understanding of business processes and service delivery. Proficient in GitHub version control and collaboration workflows, I've contributed to impactful projects such as the Umurage Arts website (umuragearts.com), an automated voting system, and various machine learning applications. Known for delivering efficient, user-centered solutions, I am dedicated to combining technical and business acumen to drive meaningful outcomes.

Work Experience

Full stack developer, Umurage arts, Kigali
September 2023 - Present

Designed and develop umuragearts.com website

Education

Advanced TVET Certificate in Business Services, Groupe Scolaire Notre Dame de la Paix Cyanika (1)
January 2018 - August 2021

Hobbies

In my free time, I enjoy coding personal projects/exploring new tech trends, [reading about AI advancements. These hobbies help me stay refreshed, continually learn, and bring new perspectives to my work.
